Art Unit: 2652

Claims 2-12, 15 are now pending.

### **Drawings**

1. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 8/30/01 have been approved by the Examiner.

# Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 4. Claims 2-12, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boutaghou (US 5,796,556) in view of Lambert (US 5,795,162). Boutaghou discloses a suspension assembly for use in a magnetic disk drive apparatus (see col. 1, lines 10-15); the disk drive further including: a selection means for positioning a transducer (not shown; E-block arm); a conducting means 20 for providing electrical connection between the transducer and an external circuit; flexible circuit 14; transducer 28; and a magnetic disk 32 (see FIG. 3), with the flex cable includes a substrate 18 made of polyamide or other preferably suitable materials.

Art Unit: 2652

While one of having ordinary skill would be well aware of all "preferably suitable materials", Lambert is cited to specifically show many of these materials (see col. 5-col. 6) and specifically a LCP known as Vectran (see col. 5, lines 40-65). Vectran, like other LCP's are considered to include desired characteristics for use in flexible circuits. From this, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have utilized the LCP "Vectran" to form the substrate 18 of Boutaghou. The motivation would have been: lacking any unobvious or unexpected results, choosing a LCP, e.g. Vectran, would have been provided through routine engineering optimization and experimentation, as taught by Lambert, since it would have at least been considered to be encompassed by "preferably suitable materials". For example. LCPs are known to be able to withstand high temperatures (520 degrees) before disintegrating which is an important consideration in flex circuit material. Furthermore, it is noted that it is within the knowledge of a skilled artisan to select known materials on the basis of its suitability for the intended use; See In re Leshin, 125 USPQ 416 (CCPA 1960). It is noted with respect to claims 3 & 5 that the thicknesses of the substrate would have been provided through routine engineering optimization as well.

### Response to Amendment

5. Response to applicant's remarks filed 8/30/01.

A...Applicant's arguments have been fully considered but they are not persuasive.

More specifically, applicant asserts that the teachings of Lambert would not be applicable to flex circuits in a disk drive. This is found unpersuasive by the Examiner at least because Lambert is only cited to show some "preferably suitable materials" for flex circuit substrates. A skilled

Art Unit: 2652

artisan has the knowledge of preferred materials on the basis of its suitability for the intended use, as set forth, supra.

**B...**The remarks directed to Himes et al are moot as this reference is no longer relied upon by the Examiner.

#### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian E. Miller whose telephone number is (703) 308-2850. The examiner can normally be reached on M-F 8am-5:30pm (FF off).

Art Unit: 2652

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa T. Nguyen can be reached on (703) 305-9687. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9314 for regular communications and (703) 872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-4750.
